# AI Budget Planner

Work out what an AI project might cost — and whether it pays back.

## 1 — The task & its current cost

**Task you'd apply AI to:**

**What it costs you now** (hours/week × wage, or lost sales):

## 2 — Which tier fits?

- [ ] **Off-the-shelf tool** — free to a few £/month
- [ ] **Business subscription** — £/user/month
- [ ] **Chatbot / AI agent** — setup + monthly, scales with use
- [ ] **Custom solution** — pilot from low £thousands, then fixed-price build

## 3 — Payback check

| | Per month | Per year |
|---|---|---|
| Cost of the AI | | |
| Time / money it saves | | |
| Net (saving – cost) | | |

If the maths works on paper, pilot it small to confirm.

**Want an exact, fixed-price number?**

We scope a pilot before any big spend. **blancore.tech**
