App Project Cost Estimator

Fill this in before you ask anyone for a quote — you'll get a far more accurate number.

1 — The essentials

Problem the app solves (one line):

Who uses it:

2 — Which cost band?

- [ ] **Simple** — one platform, a few screens (low tens of £k)
- [ ] **Mid** — accounts, payments, backend, iOS+Android (mid five figures +)
- [ ] **Complex** — custom features, real-time, integrations (into six figures)

3 — Cost drivers (tick what you need)

- [ ] Both iOS and Android
- [ ] Payments
- [ ] Third-party integrations
- [ ] Admin dashboard
- [ ] User accounts / login
- [ ] Backend + database
- [ ] Polished custom design
- [ ] Offline / real-time data

4 — Don't forget

- [ ] Budget a share of the build cost **every year** for maintenance
- [ ] Could you launch a smaller **MVP** first and add the rest later?
